

The 2026 B2B Software Stack

The tools I'd actually pay for - curated by Daniel Haket (20 yrs in international banking, ex-Deutsche Bank). AIBuilder Marketplace.

One rule guides this list: I only include tools I'd renew with my own money. It is organised by job-to-be-done, so you can pick what fits your business and skip the rest. Each pick links to my full, honest review (pros and cons).

1. Business finance & multi-currency

Pick: [Aspire](#)

One account for multi-currency, cashback cards, expenses and bill pay - with AI fraud-freeze. Replaces three banking apps.

2. Getting paid internationally

Pick: [Payoneer](#)

The veteran for cross-border receivables - get paid by global marketplaces and clients, withdraw locally.

3. Passwords & team security

Pick: [1Password](#)

The safest default for shared credentials. Adoption is high because the apps are actually pleasant to use.

4. Privacy & safe remote work

Pick: [NordVPN](#)

Fast (NordLynx) and independently audited no-logs - basic hygiene on public Wi-Fi and when travelling.

5. Sales prospecting & outreach

Pick: [Apollo](#)

A big contact database plus sequences and a dialer in one tool, with a real free tier. Best value to start outbound.

6. CRM inside your inbox

Pick: [Streak](#)

A CRM that lives in Gmail, so a Google Workspace team will actually keep it updated. Near-zero learning curve.
